Soft Denture Liner (C-25)

2 of 2

PermaSoft Soft Denture Liner is used for relining full dentures, stabilizing partials and retaining implant overdentures. It is easy to apply, adjust and finish, and can be used chairside. It may also be used in the lab with a flask or jig. Softness of the material can be adjusted to fit the case. The unique sealer resists staining and hardening. There is no methyl methacrylate but it bonds easily to acrylic surfaces. Available in Pink and Clear.

Trubyte Laboratory Quality Standards Manual - Complete Dentures

This manual will help you develop and follow a set of quality standards for your lab. It is not a detailed technique guide, but rather a manual for a Quality System that involves measurable pre-defined outcomes of various steps in the complete denture fabrication process. It is available exclusively through the National Association of Dental Laboratories (NADL), 800-382-0602. The manual offers one CE credit for CDTs.

Triad® DuaLine™ Reline Material is a dual-cure full or partial reline material which combines the accuracy of self-cure and the strength and dimensional stability of light cure. It is extrudable through a dual paste cartridge. DuaLine Reline Material flows easily, sets up in the mouth in minutes, won't distort, and is light cured for a strong, non-porous lab-quality reline. Like all Triad Materials, DuaLine Reline Material is Methyl and Butyl Methacrylate Monomer-free.

DON Bar Code & Palm Equipment – Full One Year Warranty

All DON Bar Code Laser Scanners are designed for use in the dental laboratory or dental office. This warranty is not applicable to other uses. These scanners are warranted against defects arising from defective materials and workmanship for a period of one (1) year from the date of purchase. After one year, hardware (except DON Palm) may be repaired directly through American Microsystems, Ltd. (800-648-4452). Equipment may be returned for repair after one year through DENTSPLY Trubyte at the cost of repairs plus a $50 handling fee.
