MEDICAL MATERIEL

Material Obligation Validation (MOV) Cycle 98-04

MOV Cycle 98-04 began on 20 October 1998 and is scheduled to end on 5 December 1998. If you have outstanding requisitions from the Defense Logistics Agency (DLA) that qualify for the MOV cycle (AFMAN 23-110, Chapter 8, Attachment 6), you should have received an MOV Cycle within 5 days of 20 October.

There have been many problems with MOV Cycles, most of them related to non-receipt of the images in MEDLOG.

Successfully processing a cycle results in a MOV Transaction List. The superintendent or materiel manager should review the list to determine the requirement for all items listed. This review is recommended to ensure that management is aware of old requisitions being cancelled. Cancelled requisitions cannot be reinstated. Once the appropriate action is determined, responses are processed using the "AVD" transaction.

Even if you lose the MOV Transaction or confirm that MEDLOG received the cycle correctly with an "AP9" on the AUTODIN Transaction List Part II, you can still use the "AVD" transaction to screen print each document or process on line.

If you did not receive an MOV cycle, contact the Logistics and Readiness Analysis Team at AFMLO. You can then enter your responses using the "AIT" screen. (AFMLO/FOC-A, SSgt Glenn Blackshear, DSN 343-4050)

Bulk Atropine

The bulk issue item for chemical warfare defense materiel (NSN 6505-00-299-9673, Atropine Sulfate Injection, 25ml, 2mg/ml) is no longer available. The substitute item is NSN 6505-00-957-8089, Atropine Sulfate Injection, 1 ml, 1mg/ml, 25s. The discontinued item, the 2 mg/ml 25ml vial, is being replaced by 2 boxes of 25 1 mg/ml 1ml vials of the replacement item. Please use the guidance at **Attachment 4** (revised Attachments 3 and 5 to AFMAN 23-110, Volume 5, Chapter 15) to calculate bulk chemical warfare antidote requirements. *Note: This involves bulk atropine requirements only.* Individual issue requirements (i.e. Autoinjectors) remain the same. Ensure the correct prime substitute relationships are established. (HQ AFMSA/SGSL, Capt Don Faust, DSN 240-3963)

Cost Saving Suggestion

A clear contact (shelf) paper commercially available for approximately \$3.00 a roll may be an economical substitute for traditional laminating jobs. Rather than sending various laminating jobs out to a commercial vendor, many jobs can be accomplished in-house using the cheaper, clear contact paper.

We thank Lt Brent Marquette from Offutt AFB for submitting this suggestion.

If your facility benefits from this suggestion, complete an AF Form 1000-1, Suggestion Evaluation and Transmittal and forward to the originating base suggestion program office (55 WG/MQP, 101 Washington Square Street, Offutt AFB NE 68113-2108. (AFMSA/SGSL, Mr. Randy Fontana, DSN 240-4128)

Information on the Universal Data Repository (UDR)

Why Process UDR Best PHARM / Best MEDSURG?

Today is the day of doing more with less. With a shrinking budget, and greater demands, you will be hard pressed to make your hospital dollars go far enough. In the past, product price comparisons were difficult and the data was often unreliable. With the release of DMLSS FCS, checking for the most economical item became fairly pain free; however, some of the data was not altogether sound. Now, with the UDR Best PHARM/Best MEDSURG, you have a pain free way of getting the best-priced items based on reliable data. The following example illustrates the potential savings at any account:

6505-00-003-5111

Depot Price \$72.40

PV Price (Ozark Region) \$169.55

This report indicates items equivalent to what you are buying and lists them in descending order, beginning with the cheapest item. Some bases have been accomplishing this manually for several years and have reported annual savings up to \$500,000. All items should be reviewed, regardless of source of supply. If this report is worked properly, you should be able to run it quarterly and not have an over abundance of data to review. If you have any questions, the point of contact is MSgt Gould at Scott AFB, IL, DSN 576-7661.

The AFMLL is a specialized newsletter published by the Air Force Medical Logistics Office. The AFMLL is published monthly to provide medical materiel support data to Air Force medical activities worldwide. Our mission is to ensure all Air Force medical facilities receive the highest level of medical logistics support. In that regard, we solicit your articles for inclusion in the AFMLL to relay information for use by other activities. For additional information concerning this publication, call (301) 619-4158/DSN 343-4158 or write to the AIR FORCE MEDICAL LOGISTICS OFFICE/FOA, ATTN: Rita Miller, 1423 SULTAN DRIVE, SUITE 200, FORT DETRICK, MARYLAND 21702-5006. Articles may be data faxed to (301) 619-2557 or DSN 343-2557.

The use of a name of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Air Force.

Matters requiring AFMLO action after normal duty hours may be referred to the AFMLO Staff Duty Officer. The Staff Duty Officer may be reached at DSN 343-2400 or (301) 619-2400 between the hours of 1630 and 0700 weekdays, and anytime on weekends and holidays.

MEDLOG Processing for UDR PPC

With the release of UDR 1.03 on 1 Oct 98, you are required to complete some processing in MEDLOG before processing the PPC in the UDR. Complete the following steps to download the HQ SSG executable file, UDR10.EXE, from the MEDLOG home page:
www.ssg.gunter.af.mil/medsys/medlog/.

- ◆ After downloading this file, copy it onto your PVI computer.
- ◆ To do this, exit out of the PV menu by pressing X.
- ◆ This takes you to the DOS prompt.
- ◆ Type **MD \PV_TIC** and press **ENTER**.
- ◆ Then type **COPY A:\UDR.EXE \PV_TIC** and press **ENTER**.
- ◆ Setup for the PVI computer setup is complete.

In MEDLOG, set up a Report Extract Program (REP) to extract the information needed to merge with your translation tables on the PVI computer. The arguments and report layouts are as follows:

If PS&M Pos 2	(IMF) N "A"	//Eliminates spare parts
If Function ID	(IMF) E "M"	// Optional statement. Use if you only want to look at Medical or Nonmedical
If Maintenance Code	(IMF) E " "	// Eliminates equipment and maintenance significant supply items
If Expendability Code	(IMF) E "1"	
If Requirement Code	(IMF) G "1"	// Use this to control the number of records extracted. If you want to look at every record set to 0, otherwise set as desired
If DDR	(OPB) G "000000"	// Eliminates records with no issue history
If DDR	(OPB) G "000000"	
CP Qty in Std UI	(IMF) / Qty in Adj UI	(IMF) = X-Hold-Qty

01 Stock Number	(OPB) (A)	1,15
02 Mfg Code	(IMF)	16,06
03 Mfg Part Number	(IMF)	22,18
04 X-Hold-Qty	(CRF)	40,06
05 UI Standard	(IMF)	46,02
06 Price Standard	(IMF)	48,10
07 RID	(IMF)	58,03
08 Nomenclature	(IMF)	61,25
09 DDR	(IMF)	86,06

Now that the REP is built, process and download to a diskette. Use MEDTRANS or FTP Drag and Drop. The file is **OAJREP**.

- ◆ At the DOS prompt, type **CD\PV_TIC** and press **ENTER**.
- ◆ Type **UDR10** and press **ENTER**.
- ◆ Type in the file name (OAJREP) and press **ENTER**. The program will process your MEDLOG REP with the PVI translation tables to get the part numbers loaded for each stock number. Once this process is completed, the **LOCALNSN.DBF** will be copied onto diskette.
- ◆ Insert the diskette with LOCALNSN.DBF into the computer to process the UDR PPC.
- ◆ When prompted for the import file name, click on the A drive and select **LOCALNSN.DBF**.

DG AViiON 8500 (DMLSS Server) Y2K Compliance

Electronic Data Systems (EDS) is coordinating efforts with Data General (DG) to initiate loading Y2K compliance Firmware upgrades to all existing Defense Medical Logistics Standard Support (DMLSS) DG AViiON 8500 Servers. Upgrades should be received NLT end of calendar year 1998 and loads should consist of very little server downtime (approximately one hour). (HQ AFMSA/SGSL, SSgt Gary Walters, DSN 240-3363)

Table of Allowance (TA) Updates

Attachment 1 reflects updates to a number of medical TAs. Some changes were a result of cataloging action to replace Acquisition Advice Code 'V' and 'Y' NSNs, while the Offices of Primary Responsibility (OPR) generated other changes. These changes are provided to update your WRM and Medical Equipment Management Office records. Remember to establish prime-substitutes where applicable. (AFMLO/FOC-OT, Ms. Anne Newcomer, DSN 343-4118)

USAF Medical Logistics Directory November 1998 Edition

Attachment 6 is the November 1998 issue of the USAF Medical Logistics Directory. Local reproduction is authorized. The directory is available on the AFMLO home page. (AFMLO/FOA, Ms. Rita Miller, DSN 343-4158)

Receiving Reports

An audit in finance discovered that the IAPS Section is receiving incomplete receiving reports. If receiving reports do not contain required information, payment may be delayed or the invoice returned to the vendor. As a minimum, all receiving reports or other government documentation authorizing payment shall, as a minimum, include the following criteria:

- ◆ Contract Number/Purchase Order Number

- ◆ Adequate description of supplies or services to ensure identification
- ◆ Quantities of supplies or services received or performed
- ◆ Date supplies or services were received or performed
- ◆ Total dollar amount
- ◆ Signature of government official authorized to receive supplies or services
- ◆ Printed name, title, mailing address, and telephone number of designated government official
- ◆ "Received" or similar statement

Mainly, the IAPS problem is isolated to receiving reports for commercial services (i.e. repair/return). However, the same information should appear on all receiving reports to ensure satisfaction of any audit. For stock fund receipts, maintain the local purchase receiving reports for six years and three months and ensure they are completed properly.

For more information on these requirements, contact DFAS-DE/ALA, Tom Prochazka at DSN 926-5863, commercial (303) 676-5863, e-mail: tprochazka@cleveland.dfas.mil or contact Linda Yansky at DSN 926-5861, commercial (303) 676-5861, or e-mail: lyansky@cleveland.dfas.mil.

What's New With Report of Discrepancies (RODs)?

RODs can be submitted electronically to DSCP. The Report of Discrepancy form (SF 364) is available on the AFMLO homepage, under "Our Products". Complete the form online and submit by clicking on the "Submit" button at the bottom of the form. The benefits of submitting electronic Discrepancy forms to DSCP are:

- (1) decrease in the pipeline time in reporting a discrepancy
- (2) you will have a record the ROD was submitted to DSCP

Hard copies of the SF 364 are still acceptable.

Revision to DNA Collection Instructions

The Armed Forces Repository of Specimen Samples for the Identification of Remains (AFRSSIR) has modified the bloodstain specimen card used in collecting the donor's DNA blood specimen. Collection sites are no longer required to collect a duplicate specimen on the second half of the card. The unused bloodstain card should be detached and discarded prior to collecting the donor's specimen. The duplicate card should not be used to collect another donor's specimen. Effective immediately, the donor's fingerprint is no longer required on the specimen card. A copy of the Memorandum for Military Services DNA Collection Site Personnel on the Revised Bloodstain Specimen Card can be found in **Attachment 3, page 2**. If you have questions about this revision, contact CW5 David Boyer at commercial (301) 295-4379 or e-mail at: boyer@afip.osd.mil. (AFMLO/FOM-P, Mrs. Charlotte Christian, DSN 343-4164)
