Medical Financial Leadership
Procurement Strategies
Education and Training
Regulatory and Compliance Program Leadership
Clinical Engineering and Technical Expertise
Central Program Operations

Air Force Medical Service Operational Tasks and Logistics Objectives

Provide Support to Employed Forces and Returning Casualties While Minimizing the Impact on the Medical Benefit

- Institutionalize Expeditionary Medical Logistics to meet the full spectrum of operational requirements
- Develop programs to meet Home Land Defense initiatives
- Support War Winning Operations, Humanitarian/Civic Assistance, and Disaster Preparedness Engagements
- Guide logistics predeployment, deployment, employment, and redeployment
- Lead capability based WRM financial allocation to support Air Force Medical Service contingency plans

Build a Managed Care System that Integrates Quality, Cost, and Access

- Ensure timely, accurate, and innovative financial leadership of Medical Logistics
- Provide financial leadership, training, and support
- Deliver cost effective products and services through central contracts

Be the Leader of Comprehensive and Integrated Programs of Disease Prevention, Health Promotion and Fitness

- Facilitate the education of all medical logisticians about Force Health Protection programs
- Ensure medical supplies and equipment are available to military forces for protection against disease and undue injury
- Provide quality and cost effective Force Health Protection

Promote a Safe and Healthful Environment

- Develop, organize, and execute Facilities Management and Medical Maintenance using the "hub and spoke" concept
- Mobilize facility manager "self-service" Internet capability for "Environment of Care" standards
- Stimulate facility manager applications of new technology to meet "Environment of Care" expectations
- Create an advanced course on "Facility Manager Responsibilities for the Managed Care Environment"
- Create guidelines for medical facility configurations for response to local terrorist attacks
- Establish "Environment of Care" standards for deployed medical facility configurations
- Improve access to timely medical materiel quality assurance information

Provide Responsive and Sensitive Health Care Atmosphere

- Enhance open, trusting communication with all stakeholders
- Modernize medical equipment assets and facility infrastructure
- Plan, program, and budget for state-of-the-art medical equipment, information technology, and real property maintenance
- Lead acquisition and contracting strategies

Capitalize on the Opportunity to Improve Processes at All Levels

- Create a Web based corporate medical logistics information management system that implements industry best practices
- Deliver "best practice" processes to all levels of logistics via the Internet
- Institutionalize the application of project management principles throughout the medical logistics community
